Education

UNIVERSITY OF THE PHILIPPINES   Cebu City, Philippines
BS Computer Science | First Year 1.95 GWA (Equivalent to 3.3)   Expected July 2028
Relevant Coursework: Data Structures and Algorithms, Programming Paradigms

Experience

Graphic Designer   Cebu City, Philippines
Project-based   September 2025 – Present
- Designed a clear and visually structured PCR flowchart poster using Figma for client's class requirement
- Applied layout hierarchy, icons, and color consistency to simplify complex processes for easy understanding

UP Computer Science Guild - TekToks   Cebu City, Philippines
Creatives Committee   September 2024 – June 2025
- Designed graphics and digital assets for a student-run podcast about tech news
- Contributed to branding and content planning, leading to increased viewership and engagement

Certifications & Achievements

The Odin Project   Cebu City, Philippines
Intermediate HTML & CSS   December 2025 – January 2026
- Completed Odin Foundations, mastering HTML, CSS, JavaScript, and Git through hands on web projects
- Built strong problem solving and Git workflow skills by shipping small sites from scratch through Github Pages

The Odin Project   Cebu City, Philippines
Advanced HTML & CSS   July 2025 – August 2025
- Built my first personal portfolio using semantic HTML, CSS, and vanilla JavaScript
- Designed and implemented a responsive portfolio homepage following modern layout and styling best practices.

DICT Regional Pitching Competition   Zamboanga City, Philippines
Presenter   August 2023 – October 2023
- Outperformed college teams as only SHS group to place 4th in startup pitch
- Gained experience in public speaking and pitching technical concepts

Projects

BudgetWise Landing Page
- Developed a comprehensive, multi-section landing page using vanilla HTML/CSS/JS, implementing a custom design system to showcase financial tracking features with a focus on clean typography and visual hierarchy

Snippit Landing Page
- Architected an intuitive, animated landing page for a video tool using React and Tailwind CSS, utilizing Framer Motion to build high-performance micro-interactions

Ligtasyon Landing Page
- Engineered a high-fidelity landing page for a disaster-readiness platform using React + Vite, leveraging Framer Motion to implement smooth, state-driven transitions and a responsive UI designed for emergency information clarity
