Education

UNIVERSITY OF THE PHILIPPINES — Cebu City, Philippines
BS Computer Science | Second Year 1.59 GWA (Cum Laude Standing) — Expected July 2028

Experience

InstaCode — California, USA
Fullstack Developer • Full-time • Remote — March 2026 – August 2026

- Built fullstack features using Vue.js and InstaCode, including a notes feature with dynamic filtering, category management, inline editing, and unit tests covering logic and edge cases
- Built the My Plan feature in Vue.js: active achievement, daily log, action checklist, and full plan view components backed by plan, achievement, action, and log entities, with progress and status logic in a shared utils module
- Developed a Groq-based AI coach chat widget with context-aware prompts, suggested prompt chips, markdown-rendered responses, and a floating interface for real-time coaching
- Integrated the InstaCode MCP server so AI agents can query app data, and resolved data-visibility bugs caused by missing foreign-key links between entity types
- Contributed to a JSON-driven datatype schema engine used for validation, test-data generation, and database type mapping, including the in-browser datatype tester

XGrowth — South Dakota, USA
Website Manager & Designer • Full-time • Remote — March 2026 – October 2026

- Designed website layouts in Figma and built 1440px HTML page drafts (8+ pages including listings, location, sell, and neighborhood hubs) on a shared design system of color tokens and typography
- Implemented approved designs on the Snapps (Duda) site builder, managing layout, content, and responsive behavior across devices from draft to live deployment
- Diagnosed responsive issues caused by the builder re-applying inline styles over CSS overrides, and fixed them through grid and breakpoint settings
- Managed a real estate CRM, keeping property listings, client records, and workflow updates accurate and current

Certifications

Datacamp — Cebu City, Philippines
LLMOps Concepts — February 2026

- Covered the LLM application lifecycle from development to deployment, including data governance and security.

Datacamp — Cebu City, Philippines
Prompt Engineering with the OpenAI API — February 2026

- Practiced Chain-of-Thought, few-shot prompting, and structured outputs with the OpenAI API.

Datacamp — Cebu City, Philippines
Intermediate SQL — February 2026

- Wrote joins, subqueries, and aggregations to analyze relational datasets.

Projects

BudgetWise

- Architected a full-stack financial management app using Next.js, Tailwind CSS, Claude AI, and Supabase featuring real-time income/expense tracking, e-wallet integrations, and automated data-driven financial tips
- Engineered a high-performance landing page using Vanilla HTML/CSS/JS with seamless scroll and modern hover animations

FinFlow

- Built a local-first financial advisor skill that projects cash flow from income and recurring expenses to answer real-time affordability questions, using Python with a private, git-safe JSON profile store**.**

Ligtasyon Landing Page

- Engineered a high-fidelity landing page for a disaster-readiness platform using React + Vite, leveraging Framer Motion to implement smooth, state-driven transitions and a responsive UI designed for emergency information clarity

Skills

Programming: C++, C#, Python, HTML, CSS, Tailwind CSS, JavaScript, TypeScript, Vue.js, React, Vite, Node.js, Next.js, SQL, Docker
AI Tools: Claude Code, Codex, Gemini, GitHub Copilot
AI Engineering: LLM integration (Groq API, Claude API), MCP, prompt engineering
Tools: Canva, Figma, Adobe Lightroom & Photoshop, Davinci Resolve
Languages: English (fluent), Filipino (fluent), Bisaya (native), Chavacano (native)
Creative & Communication: Campus journalism, graphic design, photography, video editing
